### Recombinant CXCL3 (C-X-C motif chemokine 3), Human

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant CXCL3 (C-X-C motif chemokine 3), Human

Species: Human
Expression Host: E. coli

**Expression cDNA Clone** 

or AA Sequence:

e ASVVTELRCQCLQTLQGIHLKNIQSVNVRSPGPHCAQTEVIATLKNGKKACLNPASPMVQKIIEKILNKGST

N with polyhistidine tag at the N-terminus.

Tag: His Tag (N-term)

**Predicted MW:** The protein has a calculated MW of 8.67 kDa. The protein migrates as 11 kDa under reducing

condition (SDS-PAGE analysis).

**Purity:** >98% as determined by SDS-PAGE.

Buffer: The protein was lyophilized from a 0.2 μm filtered solution containing 1X PBS, pH 7.4.

**Bioactivity:** Measure by its ability to chemoattract BaF3 cells transfected with human CXCR2. The ED₅₀ for

this effect is <2 ng/mL.

**Endotoxin:**  $< 0.1 \; EU \; per \; 1 \; \mu g \; of \; the \; protein \; by \; the \; LAL \; method.$ 

**Reconstitution Method:** Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the

lyophilized protein in sterile  $H_2O$  to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved.

Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.

**Applications:** Cell culture

Storage: Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to

8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -

20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.

UniProt ID: P19876

**Synonyms:** GRO-y: MGSAy, MIP-2β, GRO3

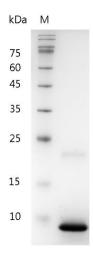

### **Summary:**

C-X-C motif chemokine 3 (CXCL3) also named Growth-regulated oncogene gamma (GROγ), which is a chemokine of the intercrine alpha family. CXCL3 is a 8kDa protein containing 73 amino acid residues. During inflammation, CXCL3 is activated by the TNF and IL-1 which mediates the monocytes migration and adhesion by targeting the CXCR2. CXCL3 activates the JNK activity which induce the cell differentiation.
