# Product datasheet for TP728275S

#### **Recombinant LIF, Human**

### **Product data:**

Product Type:	Recombinant Proteins
Description:	Recombinant LIF, Human
Species:	Human
Expression Host:	E. coli
Expression cDNA Clone or AA Sequence:	SPLPITPVNATCAIRHPCHNNLMNQIRSQLAQLNGSANALFILYYTAQGEPFPNNLDKLCGPNVTDFPPF HANGTEKAKLVELYRIVVYLGTSLGNITRDQKILNPSALSLHSKLNATADILRGLLSNVLCRLCSKYHVGHVD VTYGPDTSGKDVFQKKKLGCQLLGKYKQIIAVLAQAF with polyhistidine tag at the N-terminus.
Tag:	His Tag (N-term)
Predicted MW:	The protein has a calculated MW of 20.52 kDa. The protein migrates as 18 kDa under reducing condition (SDS-PAGE analysis).
Purity:	>98% as determined by SDS-PAGE.
Buffer:	The protein was lyophilized from a 0.2 $\mu m$ filtered solution containing 1X PBS, pH 7.4.
Bioactivity:	Measure by its ability to induce TF-1 cells proliferation. The $ED_{50}$ for this effect is <0.2 ng/mL.
Endotoxin:	<0.1 EU per 1 $\mu$ g of the protein by the LAL method.
Reconstitution Method:	Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile H <sub>2</sub> O to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved. Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.
Applications:	Cell culture
Storage:	Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to 8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.
UniProt ID:	<u>P15018</u>
Synonyms:	Differentiation-stimulating factor, D factor, Melanoma-derived LPL inhibitor (MLPLI), Interleukin 6 family cytokine

	Recombinant LIF, Human – TP728275S
--	------------------------------------

Summary:Leukemia inhibitory factor (LIF) is a pleiotropic glycoprotein, belonging to the IL-6 receptor<br/>family. LIF is a 19.7 kDa protein containing 202 amino acid which high expression in human<br/>liver, bone, uterus, kidney and the central nervous system. LIF is an inducer of differentiation<br/>in M1 leukemia cells, osteoblasts and glia. Not only stimulates proliferation of DA1 cells<br/>inhibits proliferation of corticotrophs and promote cell survival in some cell types but also<br/>induce apoptosis in others.
