| Product Type:                            | Recombinant Proteins   |
|--|--|
| Description:                             | Recombinant Neurturin, Human   |
| Species:                                 | Human  |
| Expression Host:                         | E. coli  |
| Expression cDNA Clone<br>or AA Sequence: | MARLGARPCGLRELEVRVSELGLGYASDETVLFRYCAGACEAAARVYDLGLRRLRQRRRLRRERVRAQPCC<br>RPTAYEDEVSFLDAHSRYHTVHELSARECACV with polyhistidine tag at the C-terminus.  |
| Tag:                                     | His Tag (C-term)   |
| Predicted MW:                            | The protein has a calculated MW of 12.62 kDa. The protein migrates as 13 kDa under reducing condition (SDS-PAGE analysis).   |
| Purity:                                  | >98% as determined by SDS-PAGE.  |
| Buffer:                                  | The protein was lyophilized from a 0.2 $\mu m$ filtered solution containing 1X PBS, pH 7.4.  |
| Bioactivity:                             | Measure by its ability to induce proliferation in SH-SY5Y cells. The ED₅₀ for this effect is <50 ng/mL.  |
| Endotoxin:                               | <0.1 EU per 1 $\mu$ g of the protein by the LAL method.  |
| Reconstitution Method:                   | Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the<br>lyophilized protein in sterile H <sub>2</sub> O to a concentration not less than 100 µg/mL and incubate<br>the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved.<br>Do Not Vortex! Vigorous shaking may impair the biological activity of the protein. |
| Applications:                            | Cell culture   |
| Storage:                                 | Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to 8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.                                 |
| UniProt ID:                              | <u>Q99748</u>  |
| Synonyms:                                | NTN, NRTN  |

Recombinant Neurturin, Human - TP728278S

Summary:Human Neurturin is a 22 kDa cytokine with 197 amino acid residues. Neurturin belongs to<br/>the same TGF-beta (transforming Growth Factors β) family. When Neurturin binds to GFRα-2<br/>(GPI-linked receptor termed GDNF family receptor α-2), this complex activates Ret receptor<br/>tyrosine kinase and its downstream signaling pathway.
