### Recombinant CXCL1 (C-C motif chemokine ligand 1), Mouse

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant CXCL1 (C-C motif chemokine ligand 1), Mouse

Species: Mouse Expression Host: E. coli

**Expression cDNA Clone** 

or AA Sequence:

NELRCQCLQTMAGIHLKNIQSLKVLPSGPHCTQTEVIATLKNGREACLDPEAPLVQKIVQKMLKGVPK.

Tag: Tag Free

**Predicted MW:** The protein has a calculated MW of 7.45 kDa. The protein migrates below 11 kDa under

reducing condition (SDS-PAGE analysis).

**Purity:** >95% as determined by SDS-PAGE.

**Buffer:** The protein was lyophilized from a 0.2 μm filtered solution containing 50 mM Tris and 150

mM NaCl, pH 8.5.

**Bioactivity:** Measure by its ability to chemoattract BaF3 cells transfected with human CXCR2. The ED₅₀ for

this effect is <15 ng/mL.

**Endotoxin:**  $< 0.1 \text{ EU per 1} \mu \text{g of the protein by the LAL method.}$ 

**Reconstitution Method:** Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the

lyophilized protein in sterile  $H_2O$  to a concentration not less than 100  $\mu g/mL$  and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved.

Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.

Applications: Cell culture

Storage: Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to

8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -

20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.

UniProt ID: P12850

**Synonyms:** GRO-α: MGSAα, NAP-3, GRO1, KC (murine)

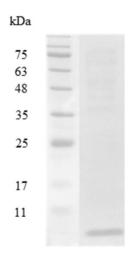

#### **Summary:**

C-X-C motif chemokine 1 (CXCL1) also named Growth-regulated oncogene alpha (GRO $\alpha$ ), which is a chemokine of the intercrine alpha family. CXCL1 is a 7.5 kDa protein containing 68 amino acid residues. CXCL1 is often expressed in immune cells such as macrophage and neutrophils. CXCL1 plays an important role with immune responses and cancer progression. CXCL1 activates the cell signal transduction with casepas1 that affects the cell proliferation, differentiation and migration.
