

# Product datasheet for TP728323L

# Recombinant HMGB1 (High mobility group box 1), Mouse

## **Product data:**

Product Type:	Recombinant Proteins
Description:	Recombinant HMGB1 (High mobility group box 1), Mouse
Species:	Mouse
Expression Host:	E. coli
Expression cDNA Clone or AA Sequence:	MGKGDPKKPRGKMSSYAFFVQTCREEHKKKHPDASVNFSEFSKKCSERWKTMSAKEKGKFEDMAKADK ARYEREMKTYIPPKGETKKKFKDPNAPKRPPSAFFLFCSEYRPKIKGEHPGLSIGDVAKKLGEMWNNTAAD DKQPYEKKAAKLKEKYEKDIAAYRAKGKPDAAKKGVVKAEKSKKKKEEEDDEEDEEDEEEEEEEDEDEEED DDDE with polyhistidine tag at the C-terminus
Tag:	His Tag (C-term)
Predicted MW:	The protein has a calculated MW of 25.56 kDa. The protein migrates as 25-35 kDa under reducing condition (SDS-PAGE analysis).
Purity:	>95% as determined by SDS-PAGE.
Buffer:	The protein was lyophilized from a 0.2 $\mu m$ filtered solution containing 1X PBS, pH 7.4.
Bioactivity:	Measure by its ability to induce TNF alpha in RAW264.7 cells. The $ED_{50}$ for this effect is <15
	ng/mL.
Endotoxin:	ng/mL. <0.1 EU per 1 μg of the protein by the LAL method.
Endotoxin: Reconstitution Method:	
	<0.1 EU per 1 µg of the protein by the LAL method. Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile H <sub>2</sub> O to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved.
Reconstitution Method:	<ul> <li>&lt;0.1 EU per 1 µg of the protein by the LAL method.</li> <li>Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile H<sub>2</sub>O to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved. Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.</li> </ul>
Reconstitution Method: Applications:	<ul> <li>&lt;0.1 EU per 1 µg of the protein by the LAL method.</li> <li>Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile H<sub>2</sub>O to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved. Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.</li> <li>Cell culture</li> <li>Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to 8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -</li> </ul>

## CRIGENE Recombinant HMGB1 (High mobility group box 1), Mouse – TP728323L

Summary:High Mobility Group protein B1 protein (HMGB1) is the high mobility group box family of non-<br/>histone chromosomal proteins. Human HMGB1 is expressed as a 25 kDa single chain<br/>polypeptide containing three domains: two N-terminal HMG boxes A and B, and a negatively<br/>charged 30 a.a. C-terminal region that contains only Asp and Glu. Post-translational<br/>modification on HMGB1 have been reported, affects its localization, receptor interactions,<br/>and function. HMGB1, with a disulfide bond between C23 and C45, have been reported that<br/>cause cytokine production and the activation of NF-κB. Otherwise, the fully oxidized form has<br/>no immune function, losing its proinflammatory effect and the apoptotic cell death activation<br/>function.
