| Product Type:                            | Recombinant Proteins   |
|--|--|
| Description:                             | Recombinant IL-33 (Interleukin-33), Mouse  |
| Species:                                 | Mouse  |
| Expression Host:                         | E. coli  |
| Expression cDNA Clone<br>or AA Sequence: | MSIQGTSLLTQSPASLSTYNDQSVSFVLENGCYVINVDDSGKDQEQDQVLLRYYESPCPASQSGDGVDGK<br>KLMVNMSPIKDTDIWLHANDKDYSVELQRGDVSPPEQAFFVLHKKSSDFVSFECKNLPGTYIGVKDNQLA<br>LVEEKDESCNNIMFKLSKI with polyhistidine tag at the C-terminus.  |
| Tag:                                     | His Tag (C-term)   |
| Predicted MW:                            | The protein has a calculated MW of 18.51 kDa. The protein migrates as 17-25 kDa under reducing condition (SDS-PAGE analysis).  |
| Purity:                                  | >98% as determined by SDS-PAGE.  |
| Buffer:                                  | The protein was lyophilized from a 0.2 $\mu m$ filtered solution containing 1X PBS, pH 7.4.  |
| Bioactivity:                             | Measure by its ability to induce proliferation in D10.G4.1 cells. The ED₅₀ for this effect is <40 pg/mL. The specific activity of recombinant mouse IL-33 is > 2 x 10 <sup>7</sup> IU/mg.  |
| Endotoxin:                               | <0.1 EU per 1 $\mu$ g of the protein by the LAL method.  |
| Reconstitution Method:                   | Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the<br>lyophilized protein in sterile H <sub>2</sub> O to a concentration not less than 100 μg/mL and incubate<br>the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved.<br>Do Not Vortex! Vigorous shaking may impair the biological activity of the protein. |
| Applications:                            | Cell culture   |
| Storage:                                 | Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to<br>8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g.<br>0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -<br>20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.                       |
| UniProt ID:                              | <u>Q8BVZ5</u>  |
| Synonyms:                                | IL-1 F11, NF-HEV, 9230117N10Rik  |

|  | Recombinant IL-33 (Interleukin-33), Mouse – TP728354L |
|--|---|
|--|---|

Summary: Interleukin 33 (IL-33) is a 17.65 kDa cytokine with 159 amino acid residues. IL-33 is a member of the IL-1 family and secreted from various cell types, such as mast cells, macrophages, endothelial cells, and epithelial cells. IL-33 activates NF-kB and MAPK signaling pathways that stimulate the secretion of type 2 cytokines like IL-5 and IL-13 when IL-33 binds to the ST2 receptor primarily expressed in mast cells and Th2 cells. In addition to Th type 2 responses, IL-33 participates in maintaining barrier tissue defense.
