Cardiac Troponin T (TNNT2) (NM_000364) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Human troponin T type 2 (cardiac) (TNNT2), transcript variant

1, full length, with N-terminal HIS tag, expressed in E.Coli, 50 ug

Species: Human
Expression Host: E. coli

Expression cDNA Clone

or AA Sequence:

A DNA sequence encoding the full-length of TNNT2

Tag: N-HIS

Predicted MW: 35.4KDa

Concentration: >0.05 µg/µL as determined by spectrophotometrically □A280 □ method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Lyophilized from 0.01 M HCl, reconstitute with Tris/urea buffer (20 mM Tris, pH 7.5, 7 M urea,

5 mM EDTA, 15 mM β-mercaptoethanol)

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -20°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 000355

 Locus ID:
 7139

 UniProt ID:
 P45379

 RefSeq Size:
 1153

 Cytogenetics:
 1q32.1

 RefSeq ORF:
 885

Synonyms: CMD1D; CMH2; CMPD2; cTnT; LVNC6; RCM3; TnTC

Cardiac Troponin T (TNNT2) (NM_000364) Human Recombinant Protein - TP750172

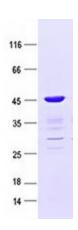

Summary:

The protein encoded by this gene is the tropomyosin-binding subunit of the troponin complex, which is located on the thin filament of striated muscles and regulates muscle contraction in response to alterations in intracellular calcium ion concentration. Mutations in this gene have been associated with familial hypertrophic cardiomyopathy as well as with dilated cardiomyopathy. Transcripts for this gene undergo alternative splicing that results in many tissue-specific isoforms, however, the full-length nature of some of these variants has not yet been determined. [provided by RefSeq, Jul 2008]

Protein Families: Druggable Genome

Protein Pathways: Cardiac muscle contraction, Dilated cardiomyopathy, Hypertrophic cardiomyopathy (HCM)

Product images:

Purified recombinant protein TNNT2 was analyzed by SDS-PAGE gel and Coomossie Blue Staining.
