

Product datasheet for TP760496

ATF2 (NM 001880) Human Recombinant Protein

Product data:

Product Type:

Expression Host:

or AA Sequence:

Predicted MW:

Concentration:

Description:

Species:

Tag:

Purity:

Buffer:

Note:

Stability:

Recombinant Proteins Purified recombinant protein of Human activating transcription factor 2 (ATF2), full length, with N-terminal HIS tag, expressed in E.Coli, 50ug Human E. coli **Expression cDNA Clone** A DNA sequence encoding human full-length KLF12 N-His 54.4 kDa >0.05 µg/µL as determined by microplate BCA method > 80% as determined by SDS-PAGE and Coomassie blue staining 25 mM Tris-HCl, pH 8.0, 150 mM NaCl, 1% sarkosyl, 10% glycerol

For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.

Store at -80°C. Storage:

> Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq:	<u>NP 001871</u>
Locus ID:	1386
UniProt ID:	<u>P15336</u>
RefSeq Size:	2117

RefSeq Size: Cytogenetics: 2q31.1 **RefSeq ORF:** 1515 Synonyms: CRE-BP1; CREB-2; CREB2; HB16; TREB7

ATF2 (NM_001880) Human Recombinant Protein - TP760496

Summary: This gene encodes a transcription factor that is a member of the leucine zipper family of DNA binding proteins. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions This protein binds to the cAMPresponsive element (CRE), an octameric palindrome. It forms a homodimer or a heterodimer with c-Jun and stimulates CRE-dependent transcription. This protein is also a histone acetyltransferase (HAT) that specifically acetylates histones H2B and H4 in vitro; thus it may represent a class of sequence-specific factors that activate transcription by direct effects on chromatin components. The encoded protein may also be involved in cell's DNA damage response independent of its role in transcriptional regulation. Several alternatively spliced transcript variants have been found for this gene [provided by RefSeq, Jan 2014]

Protein Families: Druggable Genome, Transcription Factors MAPK signaling pathway
