### NOP10 (NM\_018648) Human Recombinant Protein - TP760624

Summary:This gene is a member of the H/ACA snoRNPs (small nucleolar ribonucleoproteins) gene<br/>family. snoRNPs are involved in various aspects of rRNA processing and modification and<br/>have been classified into two families: C/D and H/ACA. The H/ACA snoRNPs also include the<br/>DKC1, NOLA1 and NOLA2 proteins. These four H/ACA snoRNP proteins localize to the dense<br/>fibrillar components of nucleoli and to coiled (Cajal) bodies in the nucleus. Both 18S rRNA<br/>production and rRNA pseudouridylation are impaired if any one of the four proteins is<br/>depleted. The four H/ACA snoRNP proteins are also components of the telomerase complex.<br/>This gene encodes a protein related to Saccharomyces cerevisiae Nop10p. [provided by<br/>RefSeq, Jul 2008]
