GRO alpha (CXCL1) (NM_001511) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Human chemokine (C-X-C motif) ligand 1 (melanoma growth

stimulating activity, alpha) (CXCL1), full length, with N-terminal HIS tag, expressed in E. coli,

50ug

Species: Human

Expression Host: E. coli

Expression cDNA Clone

or AA Sequence:

A DNA sequence encoding human full-length CXCL1

Tag: N-His

Predicted MW: 7.8 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 50 mM Tris-HCl, pH 8.0, 8 M urea

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 001502

 Locus ID:
 2919

 UniProt ID:
 P09341

 RefSeq Size:
 1184

 Cytogenetics:
 4q13.3

RefSeq ORF: 321

Synonyms: FSP; GRO1; GROa; MGSA; MGSA-a; NAP-3; SCYB1

Summary:

This antimicrobial gene encodes a member of the CXC subfamily of chemokines. The encoded protein is a secreted growth factor that signals through the G-protein coupled receptor, CXC receptor 2. This protein plays a role in inflammation and as a chemoattractant for neutrophils. Aberrant expression of this protein is associated with the growth and progression of certain tumors. A naturally occurring processed form of this protein has increased chemotactic activity. Alternate splicing results in coding and non-coding variants of this gene. A pseudogene of this gene is found on chromosome 4. [provided by RefSeq, Sep 2014]

Protein Families: Druggable Genome, Secreted Protein

Protein Pathways: Chemokine signaling pathway, Cytokine-cytokine receptor interaction, Epithelial cell signaling

in Helicobacter pylori infection, NOD-like receptor signaling pathway
