

Product datasheet for TP762598

FGF3 (NM_005247) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Description: Purified recombinant protein of Human fibroblast growth factor 3 (FGF3), full length, with Nterminal GST and C-terminal His tag, expressed in E.coli, 50ug Species: Human **Expression Host:** E. coli **Expression cDNA Clone** A DNA sequence encoding the region full length of FGF3 or AA Sequence: N-GST and C-HIS Tag: Predicted MW: 26.89 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** 50 mM Tris-HCl, pH 8.0, 8 M urea Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Storage: Store at -80°C after receiving vials. Stable for 12 months from the date of receipt of the product under proper storage and Stability: handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 005238 2248 Locus ID: **UniProt ID:** P11487 **RefSeq Size:** 1548 Cytogenetics: 11q13.3 **RefSeq ORF:** 717 Synonyms: HBGF-3; INT2

	FGF3 (NM_005247) Human Recombinant Protein – TP762598
Summary:	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities and are involved in a variety of biological processes including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This gene was identified by its similarity with mouse fgf3/int-2, a proto-oncogene activated in virally induced mammary tumors in the mouse. Frequent amplification of this gene has been found in human tumors, which may be important for neoplastic transformation and tumor progression. Studies of the similar genes in mouse and chicken suggested the role in inner ear formation. [provided by RefSeq, Jul 2008]
Protein Families:	Druggable Genome, Secreted Protein
Protein Pathways	s: MAPK signaling pathway, Melanoma, Pathways in cancer, Regulation of actin cytoskeleton

Protein Pathways:

Product images:

Purified recombinant protein FGF3 was analyzed by SDS-PAGE gel and Coomossie Blue Staining.
