Product datasheet for TR301475

Syntrophin gamma 2 (SNTG2) Human shRNA Plasmid Kit (Locus ID 54221)

Product data:

Product Type:	shRNA Plasmids
Product Name:	Syntrophin gamma 2 (SNTG2) Human shRNA Plasmid Kit (Locus ID 54221)
Locus ID:	54221
Synonyms:	G2SYN; SYN5
Vector:	pRS (TR20003)
E. coli Selection:	Ampicillin
Mammalian Cell Selection:	Puromycin
Format:	Retroviral plasmids
Components:	SNTG2 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID = 54221). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.
RefSeq:	<u>NM 018968, NM 018968.1, NM 018968.2, NM 018968.3, BC035783, BC125251, NM 018968.4</u>
UniProt ID:	<u>Q9NY99</u>
Summary:	This gene encodes a protein belonging to the syntrophin family. Syntrophins are cytoplasmic peripheral membrane proteins that bind to components of mechanosenstive sodium channels and the extreme carboxy-terminal domain of dystrophin and dystrophin-related proteins. The PDZ domain of this protein product interacts with a protein component of a mechanosensitive sodium channel that affects channel gating. Absence or reduction of this protein product has been associated with Duchenne muscular dystrophy. There is evidence of alternative splicing yet the full-length nature of these variants has not been described. [provided by RefSeq, Jul 2008]
shRNA Design:

Syntrophin gamma 2 (SNTG2) Human shRNA Plasmid Kit (Locus ID 54221) – TR301475

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
