## SIGLEC10 Human shRNA Plasmid Kit (Locus ID 89790)

## Product data:

Product Type:
Product Name:
Locus ID:
Synonyms:
Vector:
E. coli Selection:

Mammalian Cell
Selection:
Format:
Components:

RefSeq:

UniProt ID:
Summary:
shRNA Design:
shRNA Plasmids
SIGLEC10 Human shRNA Plasmid Kit (Locus ID 89790)
89790
PRO940; SIGLEC-10; SLG2
pRS (TR20003)
Ampicillin
Puromycin

Retroviral plasmids
SIGLEC10 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID = 89790). $5 \mu \mathrm{~g}$ purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.
NM 001171156, NM 001171157 NM 001171158 , NM 001171159 NM 001171160, NM 001171161 NM 033130 NM 001322105, NM 033130.2 NM 033130.3 NM 033130.4, NM 001171161.1, NM 001171160.1, NM 001171159.1 NM 001171158.1 NM 001171157.1, NM 001171156.1, BC101725 BC101725.1 BC009955, BC143497 BC143500 NM 033130.5

## Q96LC7

SIGLECs are members of the immunoglobulin superfamily that are expressed on the cell surface. Most SIGLECs have 1 or more cytoplasmic immune receptor tyrosine-based inhibitory motifs, or ITIMs. SIGLECs are typically expressed on cells of the innate immune system, with the exception of the B-cell expressed SIGLEC6 (MIM 604405).[supplied by OMIM, Jul 2002]
These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## Performance <br> Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with $100 \%$ identity. One of the four constructs at minimum are guaranteed to produce $70 \%$ or more gene expression knock-down provided a minimum transfection efficiency of $80 \%$ is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
