## CYB5R4 Human shRNA Plasmid Kit (Locus ID 51167)

**Product data:** 

**Product Type:** shRNA Plasmids

**Product Name:** CYB5R4 Human shRNA Plasmid Kit (Locus ID 51167)

**Locus ID:** 51167

Synonyms: cb5/cb5R; dJ676J13.1; NCB5OR

Vector: pRS (TR20003)

E. coli Selection: Ampicillin

Mammalian Cell Puromycin

Selection: Format:

Retroviral plasmids

CYB5R4 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID =

51167). 5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.

RefSeq: NM 016230, NM 016230.1, NM 016230.2, NM 016230.3, BC025380, BC025380.1, BC029339,

NM 016230.4

UniProt ID: Q7L1T6

**Summary:** NCB5OR is a flavohemoprotein that contains functional domains found in both cytochrome

b5 (CYB5A; MIM 613218) and CYB5 reductase (CYB5R3; MIM 613213) (Zhu et al., 1999

[PubMed 10611283]).[supplied by OMIM, Jan 2010]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>.

If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
