## AMAC1L2 (SLC35G5) Human shRNA Plasmid Kit (Locus ID 83650)

**Product data:** 

**Product Type:** shRNA Plasmids

**Product Name:** AMAC1L2 (SLC35G5) Human shRNA Plasmid Kit (Locus ID 83650)

Locus ID:

AMAC; AMAC1L2 Synonyms:

Vector: pRS (TR20003)

E. coli Selection: Ampicillin Mammalian Cell

Selection:

Puromycin

Format: Retroviral plasmids

Components: SLC35G5 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID =

83650). 5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.

RefSeq: NM 054028, BC131696, NM 054028.2

**UniProt ID:** Q96KT7

This gene is intronless and probably arose from retrotransposition of a similar gene. It has **Summary:** 

high sequence similarity to the gene encoding acyl-malonyl condensing enzyme on

chromosome 17. [provided by RefSeq, Aug 2011]

These shRNA constructs were designed against multiple splice variants at this gene locus. To shRNA Design:

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>.

If you need a special design or shRNA sequence, please utilize our custom shRNA service.

## **Performance Guaranteed:**

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
