

Product datasheet for TR307030

PRR16 Human shRNA Plasmid Kit (Locus ID 51334)

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:shRNA PlasmidsProduct Name:PRR16 Human shRNA Plasmid Kit (Locus ID 51334)Locus ID:51334Locus ID:DSC54; LARGENVector:pRS (TR20003)E. coli Selection:AmpicillinMammalian Cell Selection:PuronycinFormat:Retroviral plasmidsComponents:PRR16 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID = 51334). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001300783, NM 001308087, NM 001308088, NM 016644, NM 016644, 1, NM 016644, 2 NM 001300783.1, BC03888, BC092474, BM728431UniProt ID:Q569H4Summary:Regulator of cell size that promotes cell size increase independently of mTOR and Hippo signaling pathways. Acts by stimulating the translation of specific mRNAs, including those encoding proteins affecting mitochondrial functions. Increases mitochondrial mass and respiration.[UniProtKB/Swiss-Prot Function]ShRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origen.com If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service.</u>		
Locus ID:51334Synonyms:DSC54; LARGENVector:pRS (TR20003)E. coli Selection:AmpicillinMammalian Cell Selection:PuromycinFormat:Retroviral plasmidsComponents:PRR16 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID = 51334). Syg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001300783, NM 001308087, NM 001308088, NM 016644, NM 016644.1, NM 016644.2, NM 001300783.1, BC038838, BC092474, BM728431UniProt ID:O569H4Summary:Regulator of cell size that promotes cell size increase independently of mTOR and Hippo signaling pathways. Acts by stimulating the translation of specific mRNAs, including those encoding proteins affecting mitochondrial functions. Increases mitochondrial mass and respiration.[UniProtKB/Swiss-Prot Function]shRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. PRR16 Human shRNA Plasmid Kit (Locus ID 51334) – TR307030

Performance Guaranteed: OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
