

Product datasheet for TR307541

CXorf38 Human shRNA Plasmid Kit (Locus ID 159013)

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:shRNA PlasmidsProduct Name:CXorf38 Human shRNA Plasmid Kit (Locus ID 159013)Locus ID:159013Vector:pRS (TR20003)E. coli Selection:AmpicillinMammalian CellPuromycinSelection:Retroviral plasmidsComponents:Cxorf38 - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID = 159013). Sug purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001330455, NM 144970, NM 144970.1, NM 144970.2, BC025334, BC025334.1, BM969708UniProt ID:Q8TB03shRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact techsupport@origene.com. If you need a special design or shRNA sequence, please utilize our custom shRNA service.PerformanceOriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection officiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Techn
