## ZNF75 (ZNF75D) Human shRNA Plasmid Kit (Locus ID 7626)

**Product data:** 

**Product Type:** shRNA Plasmids

Product Name: ZNF75 (ZNF75D) Human shRNA Plasmid Kit (Locus ID 7626)

**Locus ID:** 7626

Synonyms: D8C6; ZKSCAN24; ZNF75; ZNF82; ZSCAN28

Vector: pRS (TR20003)

E. coli Selection: Ampicillin

Mammalian Cell Puromycin

Selection:

Format: Retroviral plasmids

Components: ZNF75D - Human, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID =

7626). 5µg purified plasmid DNA per construct

29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.

RefSeq: BC029893, NM 001185063, NM 007131, NR 110381, NM 007131.2, NM 007131.3,

NM 007131.4, NM 001185063.1, NM 001185063.2, BC029787, BC109100, NM 007131.5

UniProt ID: P51815

**Summary:** This gene encodes a protein that likely functions as a transcription factor. The protein, which

belongs to the ZNF75 family, includes an N-terminal SCAN domain, a KRAB box, and five C2H2-type zinc finger motifs. Another functional gene belonging to this family is located on chromosome 16, while pseudogenes have been identified on chromosomes 11 and 12. Alternative splicing results in multiple transcripts variants. [provided by RefSeq, Jun 2010]

shRNA Design: These shRNA constructs were designed against multiple splice variants at this gene locus. To

be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u>. If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u>.

## Performance Guaranteed:

OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.

For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled shRNA control (Western Blot data preferred).
