

Product datasheet for TR518430

Gm14632 Mouse shRNA Plasmid (Locus ID 100042144)

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

100042144). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001100610, NM 001100610.1, NM 001100610.2shRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. T be certain that your variant of interest is targeted, please contact techsupport@origene.com If you need a special design or shRNA sequence, please utilize our custom shRNA service.Performance Guaranteed:OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum a guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector mu be used in comparison with the target-specific shRNA transfected samples.		
Locus ID:100042144Synonyms:OTTMUSG0000017531Vector:pRS (TR20003)E. coli Selection:AmpicillinMammalian CellPuromycinSelection:Format:Format:Retroviral plasmidsComponents:Gm14632 - Mouse, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID 100042144). Sµg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001100610, NM 001100610.1, NM 001100610.2shRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. T be certain that your variant of interest is targeted, please contact techsupport@origene.com If you need a special design or shRNA sequence, please utilize our custom shRNA service.Performance Guaranteed:OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum a guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector multiple be used in comparison with the target-specific shRNA transfected samples.	Product Type:	shRNA Plasmids
Synonyms:OTTMUSG0000017531Vector:pRS (TR20003)E. coli Selection:AmpicillinMammalian Cell Selection:PuromycinFormat:Retroviral plasmidsComponents:Gm14632 - Mouse, 4 unique 29mer shRNA constructs in retroviral untagged vector(Gene ID 100042144). 5µg purified plasmid DNA per construct 29-mer scrambled shRNA cassette in pRS Vector, TR30012, included for free.RefSeq:NM 001100610, NM 001100610.1, NM 001100610.2shRNA Design:These shRNA constructs were designed against multiple splice variants at this gene locus. T be certain that your variant of interest is targeted, please contact techsupport@origene.com If you need a special design or shRNA sequence, please utilize our custom shRNA service.Performance Guaranteed:OriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum a guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples.	Product Name:	Gm14632 Mouse shRNA Plasmid (Locus ID 100042144)

To properly assess knockdown, the gene expression level from the included scramble control vector mu be used in comparison with the target-specific shRNA transfected samples.	Components:	
PerformanceOriGene guarantees that the sequences in the shRNA expression cassettes are verified to correspond to the target gene with 100% identity. One of the four constructs at minimum a guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector mu be used in comparison with the target-specific shRNA transfected samples.	RefSeq:	<u>NM 001100610, NM 001100610.1, NM 001100610.2</u>
Guaranteed: correspond to the target gene with 100% identity. One of the four constructs at minimum a guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector mube used in comparison with the target-specific shRNA transfected samples.	shRNA Design:	These shRNA constructs were designed against multiple splice variants at this gene locus. To be certain that your variant of interest is targeted, please contact <u>techsupport@origene.com</u> . If you need a special design or shRNA sequence, please utilize our <u>custom shRNA service</u> .
(90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with		 correspond to the target gene with 100% identity. One of the four constructs at minimum are guaranteed to produce 70% or more gene expression knock-down provided a minimum transfection efficiency of 80% is achieved. Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples. For non-conforming shRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the shRNA kit. To arrange for a free replacement with newly designed constructs, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene
