shRNA Design:These shRNA constructs were designed against multiple splice variants a be certain that your variant of interest is targeted, please contact techsu If you need a special design or shRNA sequence, please utilize our custor	upport@origene.com.
Performance Guaranteed:OriGene guarantees that the sequences in the shRNA expression cassett correspond to the target gene with 100% identity. One of the four constr guaranteed to produce 70% or more gene expression knock-down provid transfection efficiency of 80% is achieved. Western Blot data is recomme evaluate the silencing effect of the shRNA constructs 72 hrs post transfect assess knockdown, the gene expression level from the included scramble be used in comparison with the target-specific shRNA transfected sampleFor non-conforming shRNA, requests for replacement product must be r (90) days from the date of delivery of the shRNA kit. To arrange for a free newly designed constructs, please contact Technical Services at techsupp Please provide your data indicating the transfection efficiency and measu expression knockdown compared to the scrambled shRNA control (West preferred).	tructs at minimum are vided a minimum ended over qPCR to ection.
