

# Product datasheet for UM500044

# L1CAM Mouse Monoclonal Antibody [Clone ID: UMAB48]

# **Product data:**

#### **Product Type: Primary Antibodies Clone Name:** UMAB48 IF, IHC, WB **Applications:** IHC 1:100 Recommended Dilution: **Reactivity:** Human, Mouse, Rat Host: Mouse Isotype: lgG1 **Clonality:** Monoclonal Full length human recombinant protein of human L1CAM (NP\_000416) produced in HEK293T Immunogen: cell. Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. Concentration: 0.5~1.0 mg/ml (Lot Dependent) **Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) **Conjugation:** Unconjugated Store at -20°C as received. Storage: Stability: Stable for 12 months from date of receipt. Predicted Protein Size: 137.8 kDa Gene Name: L1 cell adhesion molecule Database Link: NP 000416 Entrez Gene 16728 MouseEntrez Gene 50687 RatEntrez Gene 3897 Human P32004

### **GRIGENE** L1CAM Mouse Monoclonal Antibody [Clone ID: UMAB48] – UM500044

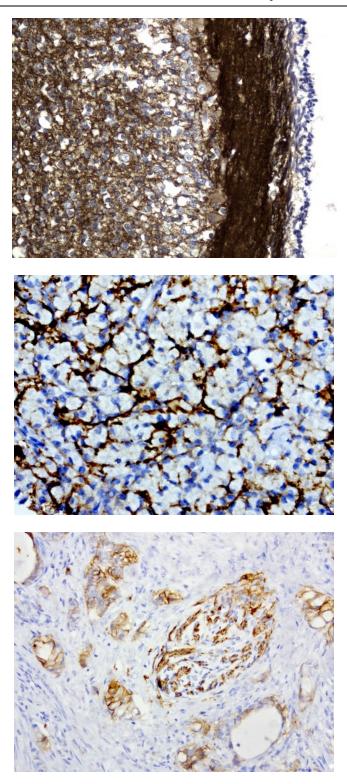

**Background:** The protein encoded by this gene is an axonal glycoprotein belonging to the immunoglobulin supergene family. The ectodomain, consisting of several immunoglobulin-like domains and fibronectin-like repeats (type III), is linked via a single transmembrane sequence to a conserved cytoplasmic domain. This cell adhesion molecule plays an important role in nervous system development, including neuronal migration and differentiation. Mutations in the gene cause three X-linked neurological syndromes known by the acronym CRASH (corpus callosum hypoplasia, retardation, aphasia, spastic paraplegia and hydrocephalus). Alternative splicing of a neuron-specific exon is thought to be functionally relevant. [provided by RefSeq, Jul 2008]

Synonyms:CAML1; CD171; HSAS; HSAS1; MASA; MIC5; N-CAM-L1; N-CAML1; NCAM-L1; S10; SPG1Protein Families:Druggable Genome, ES Cell Differentiation/IPS, TransmembraneProtein Pathways:Axon guidance, Cell adhesion molecules (CAMs)

## **Product images:**

Immunohistochemical staining of paraffinembedded Human adult brain tissue using anti-L1CAM mouse monoclonal antibody. (UM500044; heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 120°C for 3min)

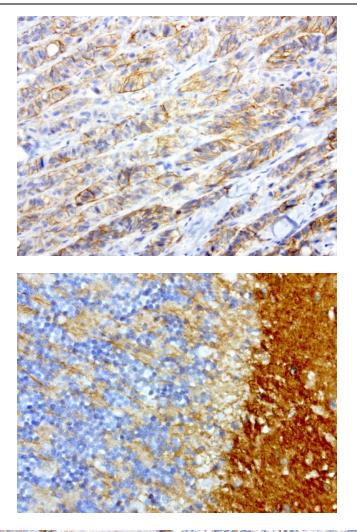

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US 

Immunohistochemical staining of paraffinembedded Human embryonic cerebellum using anti-L1CAM mouse monoclonal antibody. (UM500044; heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 120°C for 3min)

Immunohistochemical staining of paraffinembedded human pituitary using anti-L1CAM clone UMAB48 mouse monoclonal antibody (UM500044) at 1:200 with Polink2 Broad HRP DAB detection kit; heat-induced epitope retrieval with GBI ACCEL HIER buffer using pressure chamber for 3 minutes at 110C. Image shows only a subset of cells with positive cytoplasmic and membraneous stain.

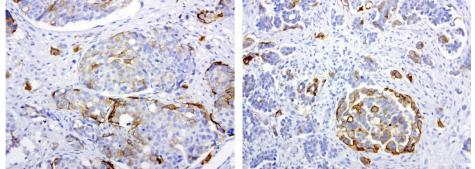

Immunohistochemical staining of paraffinembedded human colon cancer using anti-L1CAM clone UMAB48 mouse monoclonal antibody (UM500044) at 1:200 with Polink2 Broad HRP DAB detection kit; heat-induced epitope retrieval with GBI ACCEL HIER buffer using pressure chamber for 3 minutes at 110C. Image shows tumor cells with positive cytoplasmic and membraneous stain.

Immunohistochemical staining of paraffinembedded human melanoma using anti-L1CAM clone UMAB48 mouse monoclonal antibody (UM500044) at 1:200 with Polink2 Broad HRP DAB detection kit; heat-induced epitope retrieval with GBI ACCEL HIER buffer using pressure chamber for 3 minutes at 110C. Image shows strong positive membraneous and cytoplasmic staining in the tumor cells.

Immunohistochemical staining of paraffinembedded human brain using anti-L1CAM clone UMAB48 mouse monoclonal antibody (UM500044) at 1:200 with Polink2 Broad HRP DAB detection kit; heat-induced epitope retrieval with GBI ACCEL HIER buffer using pressure chamber for 3 minutes at 110C. Image shows positive cytoplasmic and membraneous stain granular layer and molecular layer.

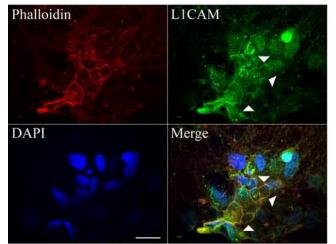

Immunohistochemical staining of paraffinembedded human ovarian carcinoma using anti-L1CAM clone UMAB48 mouse monoclonal antibody (UM500044) at 1:200 with Polink2 Broad HRP DAB detection kit; heat-induced epitope retrieval with GBI ACCEL HIER buffer using pressure chamber for 3 minutes at 110C. Image shows positive cytoplasmic and membraneous stain in a subset of the tumor cells.

Western blot analysis of extracts (35ug) from 3 cell line lysates by using anti-L1CAM monoclonal antibody (1:500).

Equivalent amounts of cell lysates (10 ug per lane) of wild-type HeLa cells (WT, Cat# LC810HELA) and L1CAM-Knockout HeLa cells (KO, Cat# [LC832196] ) were separated by SDS-PAGE and immunoblotted with anti-L1CAM monoclonal antibody UM500044 (1:2000`). Then the blotted membrane was stripped and reprobed with anti-HSP90 antibody as a loading control.

Confocal immunofluoresce image of primary rat neurons labeled with anti-L1CAM mouse monoclonal antibody (UM500044, green, 1:50). Actin filaments were labeled with TRICT-Phalloidin (red), and nuclear with DAPI (blue). Scale bar, 20µm.
