	Her2 (ERBB2) Mouse Monoclonal Antibody [Clone ID: UMAB35] – UM570035
Background:	This gene encodes a member of the epidermal growth factor (EGF) receptor family of receptor tyrosine kinases. This protein has no ligand binding domain of its own and therefore cannot bind growth factors. However, it does bind tightly to other ligand-bound EGF receptor family members to form a heterodimer, stabilizing ligand binding and enhancing kinase-mediated activation of downstream signalling pathways, such as those involving mitogen-activated protein kinase and phosphatidylinositol-3 kinase. Allelic variations at amino acid positions 654 and 655 of isoform a (positions 624 and 625 of isoform b) have been reported, with the most common allele, Ile654/Ile655, shown here. Amplification and/or overexpression of this gene has been reported in numerous cancers, including breast and ovarian tumors. Alternative splicing results in several additional transcript variants, some encoding different isoforms and others that have not been fully characterized. [provided by RefSeq, Jul 2008]

Immunohistochemical staining of paraffinembedded mouse lung tissue using anti-ERBB2 (HER2) clone UMAB35 mouse monoclonal antibody. HIER TEE buffer pH9 ([B21-100]) at 110C for 10 min, [UM500035] (1:100). Detection was done with Klear Mouse (C/N [D52-18]) DAB Kit.

Immunohistochemical staining of paraffinembedded mouse spleen tissue using anti-ERBB2 (HER2) clone UMAB35 mouse monoclonal antibody. HIER TEE buffer pH9 ([B21-100]) at 110C for 10 min, [UM500035] (1:100). Detection was done with Klear Mouse (C/N [D52-18]) DAB Kit.

OriGene overexpression protein microarray chip was immunostained with UltraMAB anti-ERBB2 mouse monoclonal antibody (Clone UMAB35). The positive reactive proteins are highlighted with two red arrows in the enlarged subarray. All the positive controls spotted in this subarray are also labeled for clarification. These data show that UltraMAB anti-ERBB2 (Clone UMAB35) very specifically recognizes ERBB2 antigen on OriGene protein microarray chip.
