| | Chromogranin A (CHGA) Mouse Monoclonal Antibody [Clone ID: UMAB109] – UM570076 |
|-------------------------|--|
| Background: | The protein encoded by this gene is a member of the chromogranin/secretogranin family of neuroendocrine secretory proteins. It is found in secretory vesicles of neurons and endocrine cells. This gene product is a precursor to three biologically active peptides; vasostatin, pancreastatin, and parastatin. These peptides act as autocrine or paracrine negative modulators of the neuroendocrine system. Other peptides, including chromostatin, beta- granin, WE-14 and GE-25, are also derived from the full-length protein. However, biological activities for these molecules have not been shown.
