# Product datasheet for UM870105

## NAPSIN A (NAPSA) Mouse Monoclonal Antibody [Clone ID: UMAB213]

#### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	UMAB213
Applications:	10k-ChIP, IHC
Recommended Dilution:	IHC 1:200~40000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 64-244 of human NAPSA(NP_004842) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.5~1.0 mg/ml (Lot Dependent)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	42.7 kDa
Gene Name:	napsin A aspartic peptidase
Database Link:	<u>NP_004842</u> <u>Entrez Gene 9476 Human</u> <u>O96009</u>
Background:	The activation peptides of aspartic proteinases plays role as inhibitors of the active site. These peptide segments, or pro-parts, are deemed important for correct folding, targeting, and control of the activation of aspartic proteinase zymogens. The pronapsin A gene is expressed predominantly in lung and kidney. Its translation product is predicted to be a fully functional, glycosylated aspartic proteinase precursor containing an RGD motif and an additional 18 residues at its C-terminus. [provided by RefSeq, Jul 2008]

# Service Mapsin A (NAPSA) Mouse Monoclonal Antibody [Clone ID: UMAB213] – UM870105

Synonyms: KAP; Kdap; NAP1; NAPA; SNAPA

Protein Families:Druggable Genome, ProteaseProtein Pathways:Lysosome

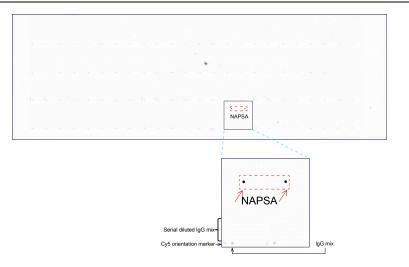

### **Product images:**

Immunohistochemical staining of paraffinembedded human lung tissue located within the normal limits of tumor using anti-NAPSA mouse monoclonal antibody. HIER pretreatment was with 1mM EDTA in 10mM Tris buffer (pH8.0) at 120°C for 2.5 min, [UM800105] was diluted 1:40000 and detected with HRP-DAB. Strong cytoplasmic and membrane staining seen in the macrophages and pneumocyte. Other cell types in lung are negative.

Immunohistochemical staining of paraffinembedded carcinoma of human lung tissue using anti-NAPSA mouse monoclonal antibody. HIER pretreatment with 1mM EDTA in 10mM Tris buffer (pH8.0) at 120°C for 2.5 minutes. [UM800105] was diluted 1:40000 and detected with HRP secondary and DAB chromogen. Strong cytoplasmic and membraneous staining seen in the tumor cells.

OriGene overexpression protein microarray chip was immunostained with UltraMAB anti-NAPSA mouse monoclonal antibody ([UM800105]). The positive reactive proteins are highlighted with two red arrows in the enlarged subarray. All the positive controls spotted in this subarray are also labeled for clarification (1:200).
