### 2.2 GHS Label elements, including precautionary statements

Not a hazardous substance or mixture.

### 2.3 Hazards not otherwise classified (HNOC) or not covered by GHS Biohazard, Biosafety Level 2

Lentiviruses are a subset of retroviruses, able to integrate into host chromosomes, and to infect nondividing cells. More recent generation vectors have been designed to diminish possible recombination resulting in a wild type- potentially infectious virus. It is usually recommended that work with nonhuman lentiviruses that are incapable of establishing productive infections in humans be conducted at BSL-2.
